

AWC

Adjustable White Controller

Adjustable White Controller Features:

- * RF wireless CCT and dimming control with the use of the touch color circle
- * Brightness selection buttons
- * 2 DIY scenes buttons, on/off button, 30s delay button
- * 5%-100% dimming
- * Control distance 40-50m

The remote control has been matched to the receiver at the factory, if deleted accidentally, you can program the ID by following the instructions below:

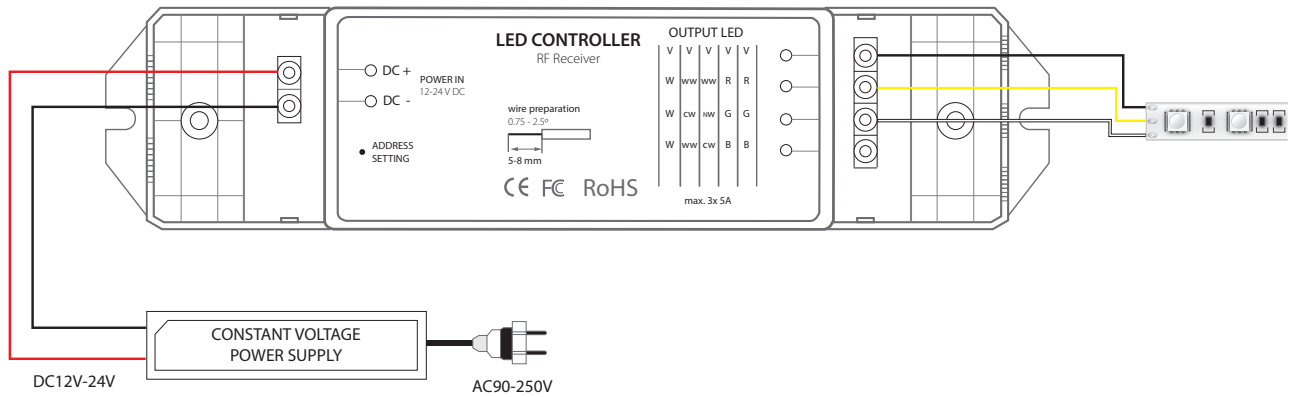

Learning ID: Press the ID learning button on the receiver until the running light is on, then press any key on the remote control. The running light will flash several times once activated..

* The receiver automatically adapts to LED strips from DC 12V-24V.
